

Tikosyn (dofetilide) Load Discharge Instructions

Medications:

Continue your medications as directed at discharge.

- Ensure you do not leave the hospital without your supply of Tikosyn capsules, or a CONFIRMED supply at your pharmacy.
- Pick up your Tikosyn today from your pharmacy - call immediately if there are any complications. Sometimes it takes a few days to fill this medication. We do not want you to miss doses.
- Call the office if you accidentally miss 2 consecutive doses of Tikosyn.
- Never start a new medication (OTC, RX, or herbal/supplement) without first ensuring there is no interaction with Tikosyn.
- Do not stop Tikosyn or change dosing unless directed to do so specifically by your cardiologist.

Education:

Tikosyn.com is a good resource for further information about the medication, pharmacies that carry the medication, and it includes a link to the patient financial assistance program.

Follow-up:

- RN visit with ECG in 1 week
- Follow-up with your cardiologist/NP in 4-6 weeks

Please visit www.southdenver.com to learn more about South Denver Cardiology and set up your patient portal for communication and results.
